9245 series ProLo

9245 series ProLo

The ProLo roof hatch is a combination roof ventilator/emergency exit that offers state of the art engineering and safety. Designed to fit nearly flush to the curvature of the roof, the roof hatch creates a tight seal with the bus that virtually eliminates leakage. The roof hatch also incorporates a simple release handle that allows that hatch to hinge open for emergency exit.

9245 = White

9245-G = Grey

- Fresh air ventilator and emergency exit
- Available in various radiuses to fit different roof curvatures
- UV/Color shift stable
- Available with or without alarm switch
- No exterior screws for installation
- Also available with bi-lingual decals
- Available with vandal lock feature
