

Specialty Manufacturing Electric Operated Stop Arms

6000 Series 2-Light

6000 Series 2-Light Incandescent

The 6000 series is a solid state unit that features two alternately flashing incandescent lights on the top and bottom on either side of the stop sign that flash alternately from one another. It is constructed from high strength engineering grade plastics for a very rugged and weather resistant design.

- Manufactured from high strength corrosion proof materials
- Available with Engineering Grade, Hi-Intensity Prismatic or Diamond Grade Decal
- Available in English and French language
- Available with optional built in flasher
- Flush lenses for easier cleaning
- Modular easy to service drive mechanism
- Available with or without wind guard
- Available with Servo Lock Mechanism (positive wind latch)

Part Number 6000-100-E11

6100 Series 2-Light Strobbing "LED"

6100 Series 2-Light Strobbing "LED"

The 6100 series Stop Arm is a 2-light strobbing LED product that has various decal and language options as outlined below.

- Manufactured from high strength corrosion proof materials
- Available with Hi-Intensity Prismatic Diamond Grade Decal
- Available in English and French language
- Standard with built in flasher
- Flush lenses for easier cleaning
- Modular easy to service drive mechanism
- Available with or without wind guard
- Available with Servo Lock Mechanism (positive wind latch)

7000 Series "LED" word "STOP"

7000 Series "LED" word "STOP"

The 7000 series is a solid state unit that spells out and flashes the word "STOP" with high intensity LED's. It is constructed from high strength engineering grade plastics for a very rugged and weather resistant design.

- Manufactured from high strength corrosion proof materials
- Available with Hi-Intensity Prismatic or Diamond Grade Decal
- Available with built in flasher
- Modular easy to service drive mechanism
- Available with or without wind guard
- Available with Servo Lock Mechanism (positive wind latch)
- Only available in English

6 Series Solid State 2-Light Strobing LED Stop Arm

6 Series Solid State 2-Light Strobing LED Stop Arm

The 6 series 2-light is a completely Solid State electrically operated unit that features two strobing high intensity LED light clusters on the top and bottom on either side of the stop sign that strobe independently and alternate from one another. It has fewer replacement parts and is virtually maintenance free. It is constructed from steel that is properly coated for corrosion resistance.

- Solid State mechanism with no micro switches or relays
- Sealed Bushings
- Internal Grounding
- Available in 2-Light strobing LED with Hi-Intensity Prismatic or Diamond Grade Decal
- Available in English or French Language

5.5 Sentinel Series 2-Light Incandescent Stop Arm

5.5 Sentinel Series 2-Light Incandescent Stop Arm

The Sentinel 2-light is an electrically operated unit that features two alternately flashing incandescent lights on the top and bottom on either side of the sign that flash alternately from one another. Its simple design and completely sealed relays ensure premium performance. It is constructed from steel that is properly coated for corrosion resistance.

Features completely sealed potted relays
 Available in 2-light incandescent with Engineering Grade, Hi-Intensity Prismatic or Diamond Grade Decal
 Available in English or French Language

5.5 Sentinel Series 2-Light Strobing LED Stop Arm

5.5 Sentinel Series 2-Light Strobing LED Stop Arm

The Sentinel 2-light Strobing LED is an electrically operated unit that features two strobing high intensity LED light clusters on the top and bottom on either side of the stop sign that strobe independently and alternate from one another. Its simple design and completely sealed relays ensure premium performance. It is constructed from steel that is properly coated for corrosion resistance.

Features completely sealed potted relays
 Available in 2-light Strobing LED with Hi-Intensity Prismatic or Diamond Grade Decal
 Available in English or French Language

005970MA

Air Operated Stop Arms

2000 Series 2-Light Strobing LED Air Operated Stop Arm

2000 Series 2-Light Strobing LED Air Operated Stop Arm

The 2000 series 2-light air operated stop arm features two strobing high intensity LED light clusters on the top and bottom on either side of the stop sign that strobe independently and alternate from one another. It is designed with simplicity in mind, with very few moving parts and a simple air diaphragm which makes this unit virtually trouble free. It is constructed from steel that is properly coated for corrosion resistance.

Available in 2-light Strobing LED with Hi-Intensity Prismatic or Diamond Grade Decal

Available in English or French Language
